

# How to Close running Programs

## How to Close running Programs for MCAS:

First do CTRL+ALT+DEL to get to task Manager

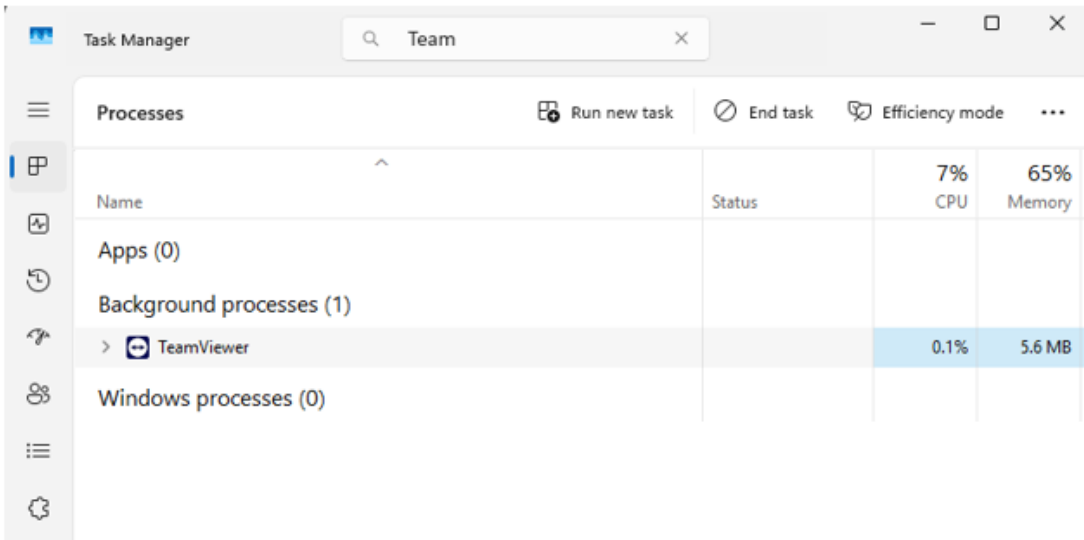

The screenshot shows the Windows Task Manager window. The 'Processes' tab is selected, displaying a list of running applications and background processes. The window title is 'Task Manager' and it includes a search bar at the top. The left sidebar shows navigation icons for Processes, Performance, Services, Settings, and Task History. The main area lists processes under 'Apps (9)' and 'Background processes (89)'. The 'Apps' section includes Google Chrome (24), Microsoft Excel, Microsoft Word, Outlook (new) (8), Remote Desktop Connection, Signal (5), SnippingTool.exe, Task Manager, and Terminal. The 'Background processes' section includes Acrobat Update Service (32 bit), Adobe Content Synchronizer (32 bit), and Adobe Crash Processor. The right side of the table shows CPU and Memory usage for each process.

Name	Status	13% CPU	65% Memory
<strong>Apps (9)</strong>			
> Google Chrome (24)		0.9%	867.6 MB
> Microsoft Excel		0%	53.2 MB
> Microsoft Word		1.2%	135.6 MB
> Outlook (new) (8)		0.1%	487.1 MB
> Remote Desktop Connection		0%	325.9 MB
> Signal (5)		0%	242.4 MB
> SnippingTool.exe		0.1%	65.0 MB
> Task Manager		7.1%	82.8 MB
> Terminal		0%	11.9 MB
<strong>Background processes (89)</strong>			
> Acrobat Update Service (32 bit)		0%	0.1 MB
> Adobe Content Synchronizer (32 bit)		0%	12.4 MB
> Adobe Crash Processor		0%	0.4 MB

In the new MCAS system it will tell you what apps are open such as Edge, Teams or TeamViewer or maybe all of those:

In the search box type the program as for example I am using TeamViewer:

Then Click the specific application

Click the background process and end task.

This should be for all processes or applications then reopen MCAS app and you will get to the sign in screen.
